Akademische Raumfahrt Initiative Schweiz

We are looking for a Sponsoring Team

Our student initiative is based at ETH Zürich and inspires students across Switzerland in hands-on space engineering challenges through collaboration with academia and industry. Our current projects are participating at the [Spaceport America Cup](#) and developing a Hybrid Rocket Engine.

Following our success with [Project TELL](#) ARIS aims to extend its network across industry and academia in Switzerland and Europe and become the Student Space Association.

Students with a flair for interacting and networking with people and carrying our vision into the world

The responsibility of the Sponsoring Team is to approach and convince sponsors to support ARIS' projects. You have to be comfortable presenting and pitching and you will be rewarded with contacts among key players in Switzerland. The work packages include:

- Establishing a network of partners in the private, industrial, governmental and academic sector
- Preparing project brochures, flyers, pitches as well as designing and organising sponsored marketing material
- Creating and customising exciting sponsoring packages
- Looking for and approaching potential sponsors
- Supporting and educating the teams in approaching sponsors
- Keeping the network and sponsors updated

We recruit an interdisciplinary core team that is motivated and capable to accomplish the tasks above. You should love to interact with people and have a certain virtuosity. From our members, we expect the following attitude:

- Fail, get up and learn from it
- **You don't have to be a specialist yet** but you are willing to become one
- Join the team and grow as a unit
- Be proactive and able to take responsibility

We expect you to spend 2-3 days a week and be able to join team meetings and workshops in Zurich. Since we are a student association we don't hire any interns.

Send us a short description in what you're interested in and your CV (with picture) to
